15:45 SFSU – S. Bollens

16:15 HSU – G. Crawford

16:45 CSU Hayward – M. Craig

17:15 – 18:30 Reception & Open Discussion

7 January 2003
0900 UNTIL WE ARE FINISHED

The Proposal

Format and scope of the proposal will similar to last year, but we will need to provide a Summary Progress Report from each partner on Year 1 activities (I know, you've only had money for a month or so) – please address your progress on achieving the primary objectives as stated in the original proposal with respect to:

Our key infrastructure for partner integration and long-term management of CI-CORE
Our internet-based approach to data integration and management
Our Developing expertise in two observational platform technologies:
 High resolution remote sensing of coastal environments
 Autonomous moored platforms
Identification & rescue of legacy datasets

We need 1 – 2 pages, with snappy figures & references to webpage if possible from each partner for this section

New Efforts for coming year

 Maintenance of existing data streams
 New efforts to be initiated in '03
 Data Products from CICORE
 IT/Data Management
 Development of CICORE data users – reliance on Advisory Committee

Incorporation of New CICORE partner(s)

Budget/Resource allocation:

 Let's prepare two possible scenarios:
 \$3 Million allocation (as requested)
 \$1.75 Million allocation (as per this year)
 What do you require to maintain current efforts?
 Can we bring in a new partner of the allocation is \$1.75 Million?

Assignment of proposal preparation tasks and timetable for submission
